What problem you are solving ?

In Bullet points mention which problem you are solving

Problem Statements

AI-powered mobile camera solution for real-time traffic violation detection

AI system with robust facial recognition to trace missing persons & unidentified bodies

Blockchain-based chain-of-custody system for tamper-proof digital evidence

How you're solving the problem - What is your solution for the problem Statement

Ensure the Solution should be Implementable and Feasible

Ensure the idea follows the three category below

1. Feasible
2. Viable
3. Desirable .

Feasible, Viable, and Desirable — are the three lenses of innovation

Solution Screen Shots

What is the total cost Involved in Developing the Solution with Break up of Costs

Not a Scoring criteria

We wanted to understand your seriousness in developing this Solution
